Battles between the M23 rebels and the Congolese Army continue in North Kivu. Thousands of internally displaced people are still in the city of Goma. They are living at the displaced persons camp called "Sam-Sam". KINT had planted fruit trees with partner organizations in a part of the camp. However, the trees have been destroyed due to the influx of displaced people.

共有したいことば /Words that we would like to share:

「形骸化した民主主義は本質的な民主主義を圧殺する。」作家辺見庸氏が 20 年以上前に彼の著作に書き残したことば。残念ながら、当時の彼の世相分析は更に厳しさを増して、現在に通じているようです。"Democracy in its bare form crushes democracy in its essence." These are the words of writer Yo Henmi in his book more than 20 years ago. Unfortunately, his analysis of the social climate at the time seems to have become even more severe and is still relevant today.
